THE 100% POST-CONSUMER RECYCLED P.E.T. EGG CONTAINER

Made entirely from post-consumer soda and water bottles at Global Plastics in California, where every day millions of bottles are ground, washed, and formed into containers for Hickman's Eggs. It takes about 5 bottles to make an 18 count egg container and about 3 bottles to make a 12 count egg container.

FDA Approved for Food Contact

Global Plastics uses a state of the art washing process that has earned a letter of non-objection from the **US Food and Drug Administration** for use in direct food contact applications, and is certified by the **American Institute of Baking** for good manufacturing practices in the production of food grade packaging.

Landfill & Green House Gas Reduction

P.E.T. is the most recycled type of plastic WORLDWIDE.

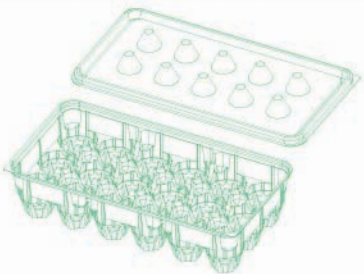

Every ton of egg packages converted to recycled P.E.T. from styrofoam reduces greenhouse gas emissions by 2.67 metric tons of CO₂.

P.E.T. is a sought after material and because of its value on the scrap market it will certainly steer clear of a landfill.

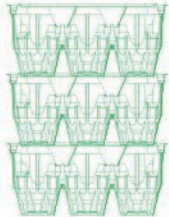

Every ton of egg packages converted to recycled P.E.T. from styrofoam saves 7.4 cubic yards of landfill space.

Innovative Design

Lock in support pillars offer **UNPARALLELED PROTECTION** by allowing the egg to be fully beneath the lid of the package.

This, complemented with the ridged cell design **REDUCES BREAKAGE** and enhances stacking strength. The unique design of the lid features a raised lip which locks in stacked packages, securing them during transportation.

The transparent package eliminates the need to open for inspection, but the **EASY TO OPEN TABS** allow the customer to do so if desired.

The globalplastics Recycling Process

1. Bottles arrive in bails from buy back centers all over California.
2. Sorted by color and category.
3. Ground and washed.
4. Formed into pellets.
5. Melted into sheet.
6. Molded into packaging.

Cradle to Cradle

Using a 100% post-consumer recycled P.E.T. package is a **2 for 1 DEAL**

You rest assured knowing the product was made out of existing materials without the use of added petroleum.

You can be confident that after its intended use it too will be recovered, melted and molded into another product, indefinitely for many years to come.

For all questions to **Hickman's Family Farms** regarding customer service, media and public relations, educational opportunities, and general inquiries, please contact us at 623-872-1120, or send an email to info@hickmanseggs.com.
